Ever conscious of the impact of words to convey underlying meaning and points of view, we chose our name, Building Blocks Preschool-An Early Childhood Learning Community, with care. **Building Blocks**, reflects our belief that we are laying an educational foundation for the children we serve to be successful throughout their lives. With this strong foundation we build upon our deep respect for children's strengths, competencies and potential. **Preschool**, we believe children are lovers of learning and we create an organized educational environment to encourage and support this desire. We partner with the children and families we serve in their **Early Childhood Learning**, is the acquisition and development of memories and behaviors, including skills, knowledge, understanding, values and wisdom. **Community**, is the strength of our school, it lies in the relationships that we build; and further, in the sense of community that we create, both within our school environment and in the Huron Valley Area.

Building Blocks Preschool begins with a strong image of all children as competent, resourceful, intelligent, creative, imaginative, and full of curiosity about the world around them. With this image before us, we listen, pay attention, plan, and co-construct with children. We strive to create a learning community of children and adults where our image of children and the thinking of students is visible to children, teachers, parents and the public.

Family Portrait by a 4-year-old Young Artist
